## **GETTING SNATCHED HAS NEVER BEEN MDRE FUN**

*New and Improved Waist Training Corsets Are Reshaping Women ... and Men*

No more long days, nights and weekends working out and eating like a bird because the newly improved Waist Training Corsets by Butler Body Wear are helping scores of women achieve the hourglass shape they desire. For hundreds of years, women have worn corsets to give the appearance of a thin waist with large hips and an even larger bust. Now, today's woman is able to have a slender waist without spending countless hours starving herself or becoming a gym enthusiast with the Butler Body Wear's Waist Training Corsets.

Cassandra "Cass" Butler, owner of Butler Body Wear, a subsidiary of The Butler Enterprises, realized that too many of her friends, including herself, wanted to have a flatter stomach and slimmer waistline. So she invested money in testing out the product to see if the benefits were true. Soon the results were noticeable and she was getting requests for orders from all over the country.

"It was like a whirlwind at first," says Butler. "All I wanted to do was help my workout and diet by wearing the Waist Trainer Corset and when I started to see results in 8-10 weeks, so did everyone else."

The secret to these Corsets is not a secret at all... it's simply being consistent and wearing it daily for up to 10 hours. These latex Corsets are durable and machine washable. Waist Training Corsets automatically shape and sculpt the body over a two month period, if worn as instructed. Corsets should not be worn so tightly that it hurts; instead it should be worn comfortably to increase the body's thermal activity which causes perspiration and mobilizes around the midsection control for loss of inches. Waist Trainers quickly takes off 2-4 inches in troubled areas such as the back, stomach and midsection and smooth out clothes with no lumps or bumps.

"Our Waist Trainers are designed for men and women from size X-Small to 5X who wants a slimmer waist and flatter stomach," adds Butler.

Who doesn't want a slimmer and smoother waist line? Butler Body Wear clients have taken their results to Instagram (@TheButlerEnt) and changed how women see their waistline. Here are some happy client's reviews:

- Nikki Jackson of Dallas says, "Your walk is different; your strut is different; and you hold your head a little bit higher."
- Teresa "Shorty" Reed "I work out in my Waist Trainer and have lost 3 inches from my waist."
- Tamara Starks shares, "After the first couple of weeks of wearing it; I was able to go over in my notches and wear my clothes again."
